

A Smarter Way to Replicate at Scale

Data volumes are growing. Replication tools are not.

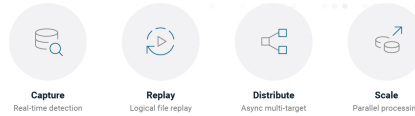

As data volumes grow, current replication solutions are becoming expensive, slow, and unscalable — resulting in operational risks and rising costs. Most SaaS tools are metered by volume and struggle to scale — leaving organizations with bottlenecks, lag, and rising risk.

THE PROBLEM Why Enterprises are Struggling

- Escalating Costs**
 SaaS tools triple in cost as data doubles. Volume-based billing grows unpredictably.
- Replication Lag**
 High data volumes delay downstream systems, reporting, and analytics.
- Business Impact**
 Delayed payment & shipping integrations translate directly to lost revenue.

THE ARCHITECTURE A Smarter, Native Replication Approach

THE SOLUTION Buchanan's Enterprise Data Replication Agent

Purpose-built for high-volume, high-velocity enterprise data environments.

- Faster Than Conventional Tools**
 Optimized replication times keeps pace with even the highest enterprise data volumes.
- Enterprise-Scale Performance**
 Fast, efficient initial full loads with optimized ongoing replication.
- Fixed-Fee, Predictable Costs**
 No volume-based metering. A fixed-fee structure that stays flat as data grows.
- Cross-Enterprise Flexibility**
 Supports multiple use cases — from ERP replication to feeding enterprise data lakes.

REAL BUSINESS OUTCOMES Deployed & Proven in Production

In collaboration with a major enterprise retailer, Buchanan has designed and deployed a replication solution that delivers substantial performance and cost improvements.

Oracle → Oracle Replication of ERP data to reporting, integration, or operation databases.	Oracle → Databricks Feeding enterprise data lakes for Analytics, Business Intelligence, and advanced reporting.
SERVICES APPLIED <ul style="list-style-type: none"> Oracle Database Optimization Enterprise Application Enablement Custom Data Replication Architecture Design 	SERVICES APPLIED <ul style="list-style-type: none"> Enterprise Data Services Oracle-to-Cloud Data Integration Performance Tuning for High-Volume Data
BUSINESS VALUE <ul style="list-style-type: none"> Near-real-time data availability 80% reduction in replication costs Stable performance at peak TX volumes 	BUSINESS VALUE <ul style="list-style-type: none"> Faster analytics & business insights Reliable large-volume data ingestion Eliminated replication lag in decisioning

RESULTS THAT MATTER The Numbers Speak for Themselves

20TB+
Replicated in Hours
vs. days with legacy tools

\$2m+
SaaS Costs Eliminated
year-over-year for enterprise

Need Help with Your Data Replication Project?

With deep expertise across Enterprise Applications, Oracle Platforms, Database Optimization, and Data Services, Buchanan delivers more than point tools. The firm partners with clients to design, build, and manage customized data solutions that align with real business needs, and integrates proven platforms with custom innovations where required.
